The "5th Florence International Hematology Meeting" will aim to share perspectives on lymphoma research and exchange information on the epidemiology, pathology, biology, and genetics of lymphoma. Key research results will be presented and new perspective in lymphoma therapy will be addressed.

The conference will include members of the International Lymphoma Epidemiology Consortium - "InterLymph" - an open forum for epidemiologic research in non-Hodgkin's lymphoma that holds annual meetings to discuss, coordinate and develop on-going and future research (<http://epi.grants.cancer.gov/Interlymph/>).

The conference in Florence will follow the 10th Interlymph meeting that will be held June 10 to 13 in Cagliari.

The conference will be of interest to epidemiologists, biologists, pathologists, and hematologists involved in research and patient care, and professionals involved in disease prevention and health promotion.
